# A $7.2 Billion Market With One Dominant Player Charging Creators 4x Too Much

OnlyFans generates $7.2B in annual gross revenue and extracts 20% of every dollar creators earn. The founder took home **$497 million in personal dividends** last year. OpenFans is building the creator-first alternative.

| $7.2B | 4.6M | 377M | $1.4B |
|---|---|---|---|
| ONLYFANS GMV (2024) | ACTIVE CREATORS | REGISTERED USERS | PLATFORM REVENUE (20%) |

## 1 The Creator Tax Problem

Every creator on OnlyFans loses 20 cents of every dollar to the platform. For a creator earning $10,000/month, that's $24,000/year gone. For top creators earning $100K/month, it's **$240,000/year**.

| OnlyFans | |
|---|---|
| Creator Payout | 80% |
| Payout Speed | 7-21 days |
| Payout Method | Bank (limited) |
| Transaction Cost | High (cards) |
| Chargebacks | Creator's loss |
| Geo Access | Restricted |

| OpenFans | |
|---|---|
| Creator Payout | 90-95% |
| Payout Speed | Instant |
| Payout Method | USDC (global) |
| Transaction Cost | <$0.01 |
| Chargebacks | None (crypto) |
| Geo Access | Global |

A creator earning **$10,000/mo** on OnlyFans keeps $8,000. On OpenFans they keep **$9,500**.
That's **$18,000 more per year** — per creator.

## 5 Milestone Roadmap

PHASE 1 — MONTHS 1-3

**Prove the Supply**

100+ creators onboarded • 50+ Founder Program signups • Live payments • Content moderation • Legal entity complete

PHASE 2 — MONTHS 4-8

**Prove the Demand**

500+ active creators • 2,000+ paying subscribers • $25K+ monthly GMV • 60%+ creator retention • iOS beta launch

PHASE 3 — MONTHS 9-14

**Prove the Economics**

2,000+ creators • 10,000+ subscribers • $100K+ monthly GMV • $5-10K monthly net revenue • NPS 50+

SERIES A TARGET — MONTH 14-18

**Scale**

> $3-5M raise at $25-40M valuation based on demonstrated GMV trajectory and creator growth

# Risk Factors & Return Scenarios

## 6 Key Risks & Mitigations

CRITICAL **Marketplace cold-start.** No creators or fans yet. Mitigated by Founder Program with exclusive incentives, affiliate referrals (1% lifetime), and direct outreach to mid-tier OF creators ($1K-$10K/mo) who benefit most from fee savings.

HIGH **5% take rate sustainability.** Requires volume to be viable. At $100M GMV, 5% = $5M net revenue. Adult content at 10% provides higher margin on majority of traffic.

HIGH **Payment/banking risk.** Crypto-native from day one. USDC on Solana eliminates traditional processor dependency entirely.

HIGH **Content moderation liability.** Budget allocated for legal counsel + AI moderation tooling. Clear ToS from day one.

MEDIUM **OnlyFans retaliates on pricing.** OF is structurally unable to cut to 5% — their $684M profit and $497M dividends depend on 20%.

MEDIUM **Solo founder risk.** First hire (growth/community lead) is immediate priority with funding.

## 7 Return Scenarios

Hypothetical illustrations based on $5M cap conversion. Not guaranteed. Subject to dilution in future rounds.

### Series A — $50M Valuation

OpenFans reaches $50K+ monthly GMV, clear growth trajectory

| $25K invested | $100K invested | $250K invested |
|---|---|---|
| **$250K** | **$1M** | **$2.5M** |
| 10x return | 10x return | 10x return |

### Series B — $200M Valuation

Captures ~5% of OnlyFans GMV ($360M annual), $18M net revenue

| $25K invested | $100K invested | $250K invested |
|---|---|---|
| **$1M** | **$4M** | **$10M** |
| 40x return | 40x return | 40x return |

### Breakout — $500M+ Valuation

Captures 10%+ of market, becomes the #2 creator subscription platform globally

| $25K invested | $100K invested | $250K invested |
|---|---|---|
| **$2.5M** | **$10M** | **$25M** |
| 100x return | 100x return | 100x return |

# Why This Could Be Big

OnlyFans takes 20% — that's **$1.44 billion per year** extracted from creators.

OpenFans at 5% returns **$1.08 billion** of that back to creators.

That's a **$1 billion annual value proposition** to the creator base.

## 8 The Scaling Math

| OF MARKET SHARE | ANNUAL GMV | NET REVENUE (5%) | EST. VALUATION |
|---|---|---|---|
| 0.1% | $7.2M | $360K | $5-10M |
| 1% | $72M | $3.6M | $30-50M |
| 5% | $360M | $18M | $150-250M |
| **10%** | **$720M** | **$36M** | **$300-500M+** |

The TAM isn't speculative. OnlyFans proved it. The only question is whether OpenFans can peel off even a small slice with fundamentally better economics.

## 9 Why OnlyFans Can't Respond

- **Structural dependency on 20%.** Their entire business model, $684M profit, and $497M owner dividends require it.
- **No crypto DNA.** Built on traditional banking rails; can't switch to instant Solana settlement.
- **Acquisition talks signal exit, not innovation.** Currently negotiating a $5.5B majority sale — focused on liquidity, not competing.
- **Creator resentment is real.** Years of fee frustration, deplatforming scares, and slow payouts have built demand for alternatives.

## 10 What Your Investment Unlocks

| MILESTONE | VALUATION IMPACT |
|---|---|
| First 100 creators onboarded | +$2-4M |
| First $10K monthly GMV | +$3-5M |
| First 1,000 paying subscribers | +$5-8M |
| Mobile app launch (iOS) | +$2-5M |
| $100K monthly GMV | Series A territory ($30M+) |
